Video: January 16-18, 2018

Run time: 5.5 hours, 7 presentations [Lessons]

Contact: Isaac Kashiwagi at Isaackashiwagi@ksm-inc.com

The 2018 Best Value Education Online Training provides a unique education that cannot be found anywhere else in the world. There are two parts to our education, which includes (1) the logic and philosophy of the Best Value Approach and (2) the application of the logic into the Best Value processes of Procurement, Project management, and Leadership within the supply chain.

To facilitate navigation and understanding, the footage from the general session of the 2018 Best Value Conference has been divided into 7 Lessons [each lesson broken into smaller sections] which will cover the basics of both logic and processes required for any beginner or intermediate in the Best Value Approach.

The lessons will be taught by Isaac Kashiwagi, who led the general session of the 2018 Annual Best Value Conference in Tempe, Arizona. For a breakout of lessons and timings see below.
